

## **SWOT Analysis – Sikandar Khan**

### **Strengths:**

- Skills in networking concepts and implementation on cisco routers
- Good entrepreneurial skills
- Good interpersonal skills
- Strong writing skills
- Good communication skills (including public speaking and giving presentations)
- Good critical and analytical skills as demonstrated by my results
- Work experience in telecommunication industry including Ericsson and Telenor, Pakistan.
- Ambitious
- Positive personal traits

### **Weaknesses:**

- No aptitude and skills for programming languages
- Bad in a conflict situation
- Get distracted by many things
- Can't focus on a lot of things at once
- Easily convinced

### **Opportunities:**

- I think CSD would be a great experience in putting the skills and theoretical knowledge into a practical perspective, which would be helpful for my career after graduation.
- Working in groups with groom me and hone my skills as a team-player.
- Eventually if the area interests me, I can do further research on it and take it as my PhD area.
- Actual experience to interact with customer (the project owner) and get feedback on my performance so help me motivate and grow in future.

### **Threats:**

- I would like to stay away from programming related tasks, because I have no interest and experience in them.
- I would not want to put things till the deadline because it putting things till the last stage doesn't gives me time to review.
